Subject: Palliative Admission-

WPWN: Pt and dtr, , like the idea that more eyes will be on pt in addition to staff at Care Center.

Level of Care: Palliative Routine

Primary Diagnosis: Chronic Pulmonary Disease

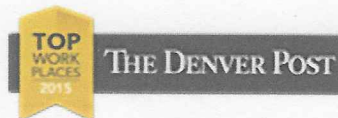

Physical/ Emotional Symptoms related: Pt is a 91 year-old male and has been residing at \ Center room for the past 5 years. n, dtr, lives within a 3 min drive of pt and is very willing to come to every apt. Pt also been diagnosed with Dementia and has trouble with history. Pt been in and out of Hospital 4x in the last few months for distress breathing. Pt is on 3L of O2 and is wheelchair bound with full assistance in transfers. Pt has a few bed sores and has a colostomy bag. Pt is a widow and lost his wife 25 years previous. ' was in the Navy and retired to work as a diesel mechanic. Family is open about process of decline and welcoming of comfort focused care. Pt has a MOST and DNR. Daughter is frustrated with level of care from facility and feels he is "falling through the cracks" because of cuts on legs from transfer, bed sores and facility failure to change pt. Dtr believes it is due to uneducated night staff. is open to the idea of Hospice. This SW spoke about level of care for Palliative v Hospice. Ann used verbalized understanding and expressed gratitude for Halcyon. Mortuary is All Vets with burial at Ft. Logan. Pt daughter labels him a ladies man. Pt daughter asks that no one of African American decent care for her father because he is "racist".

Immediate Needs: This SW Intern believes Hospice may be a better fit for family and pt needs.
